Before You Accept Done

Record what you checked for one change. Mark irrelevant items N/A with a reason.

Name the change

Change: _____

Date / branch / baseline: _____

Expected result: _____

Must keep working: _____

Check the work

[ ] App starts and the relevant page loads.

[ ] Actual user path produces the expected result.

[ ] Expected saved data survives refresh or return.

[ ] Relevant empty, error, or boundary case checked.

[ ] Related flows still work; access/session checked if affected.

[ ] Diff matches scope and exposes no real secrets.

[ ] Relevant automated checks run; results recorded.

[ ] Affected service actions checked in an appropriate test environment.

Keep the evidence

Steps performed: _____

Actual result: _____

Evidence location: _____

Not checked / reason: _____

Remaining issues: _____

Decision / next step: _____

Verified commit after committing: _____

Remember

This worksheet is a record of checks, not a complete security audit or launch approval. A successful build does not prove the user path works.
